

# The most important part of safety is training.

Safeguard your employees by providing quality training.

## Safety Consulting Services:

**Safety Program Development** We conduct safety audits or safety inspections. We develop custom tailored safety management systems that control the causes of accidents and prevent employee injuries in the workplace.

**Supervisory Safety Training** A safety seminar for supervisors and managers that explains how and why supervisory personnel play a vital role in a successful safety program. Specific communication skills, interpersonal interactions and behavioural intervention techniques are explained that can prevent employee unsafe acts that lead to accidents.

**Employee Safety Training** We will conduct authoritative, interactive safety training for your employees that will be stimulating, enjoyable and a cost effective safety consulting service.

**Safety Meeting Guides** Concise safety and OSHA compliance guidelines in outline form that can be used as reference for employee safety training, safety meetings, supervisor's safety talks. No safety consulting or safety training services are involved.

**OSHA Compliance** Safety consulting assistance with identifying and correcting OSHA violations, compliance with OSHA regulations, conducting OSHA compliance required safety training and safety inspections. We also offer approved OSHA 10-hour and 30-hour courses for entry level employees and supervisors.
